**Subject:** proposed road works on A38 around Derby

During the proposed works the local residents of Darley Abbey, Strutts Park, Little Chester and Breadsall will have to put up with the resulting congestion during rush hours thus an increase of vehicle exhaust emissions.

I have 2 suggestions,

1) carry out the works outside rush hours. or/and

2) Set up a diversion starting at Junction 28 on the M1 so that vehicles travel down the M1 to Jct 24 and go down the A50 towards the A38 (Burton upon Trent /Uttoxeter/Stoke on Trent) this will relieve some congestion, be quicker for LGVs wanting to go to any of the destinations referred to above.
