A38 FLYOVER BREADSALL DARLEY ABBEY

Dear Sir

I am strongly opposed to the work and construction of a flyover on the A38 at Breadsall

the construction will cause some 4 years of chaos and no doubt put local business] in to difficulty or bankruptsy

it will cause total chaos in Derby and the local area

Derby is a crossroads roads for East to WEST and North to South, with road, rail and airline links

I use this junction daily often many times and the congestion problem is really only around traditional rush hour + Friday pm and it

the flyover will total alter the environment at present we have a wild life development via a permanent lake, with many species of animal, where the proposed flyover development would destroy during its development

analysis of the traffic will demonstrate an excess number of commercial developments and alternatives to these should be investigated nationally

removal of traffic from the road is a sensible solution rather than build an inexhaustible supply of roads which will never be adequate

in these days of carbon emission this seems a more sensible approach

noise will be an issue and consultations around this area are not encouraging as tree fences make little difference whereas speed and road surface do and we gather there will be no speed limit.

interestingly the A38 has been closed further south recently due FLOODING

If this must be constructed why not an underpass, under the derwent tes more expensive but more satisfactory over the many years of its lifetime
