---

I live [REDACTED] and am very worried about the impact of this project on the local area.

- I do not agree with increasing the capacity of the road to take more pollution producing cars.
- Priority should be given to cycling, walking and public transport rather than more car use.
- The increased traffics will have an adverse effect on the air quality which is already poor. This will especially impact on local families and the Markeaton School children.
- Trees will be chopped down when the science behind Climate Change suggests we need to plant more trees.
- The works will affect biodiversity in the area, especially in Markeaton Park.
- For an extended time I will find it difficult to do my job [REDACTED] due to traffic chaos.
