**Subject:** Objection the A38 Roadworks  
**Date:** 10 March 2020 12:49:11

---

Dear team,

Please would you add this email to any collection of objections that are being collated in relation to the proposed works on the A38. I object as a resident [REDACTED]. While I understand rationale for the proposed work I object to the loss of habitat this would incur and am not convinced by reports that this could be replaced in the long term. I dont believe those reports and believe instead that the loss would be permanent or if redcude size and biodiversity. While I appreciate the area is congested with traffic and business requires infrastructure I do not agree that this development is the best resolution to the issue. I believe more should be done to prioritise these issues but only where equal weight is paid to our climate, our wildlife and sustainability.

Kind regards,

Hannah Dobson
