Subject: Examining Authorities Written Question EXQ1C.1.3
Date: 07 May 2019 09:55:20

Dear Sirs

I apologise for the late submission to the EXA in connection with the above question and trust that the detail below will still be considered by the EXA.

You have asked “the extent to which the assessment and methodology of the effects upon the different holdings as set out in Chapter 13 of the ES and table 13.2.2. (during construction) and 13.2.3 (during operation/post construction) are agreed and provide evidence to support any disagreement.

In connection with all of the clients that I represent this assessment methodology for both table 13.22 and table 13.23 have not been agreed and there has not been any presentation made to myself or my clients to understand the assessment methodology used and furthermore, there has not been any discussions or negotiations on this issue from Highways England or the organisation carrying out the assessments on their behalf.

This is therefore matter that requires further detailed examination.

Yours faithfully,
Howard Smith
