

## Stonehenge Riverside Project 2008

100% ploughzone recovery by hand-digging was required by English Heritage & National Trust (on land that is not a Scheduled Ancient Monument but lies within the WHS)

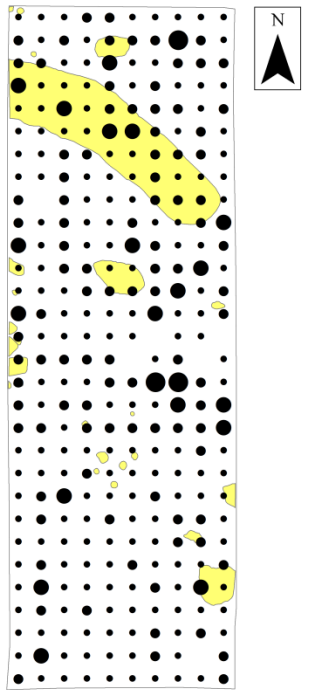

100% sampling (10mm mesh) of ploughsoil in the Palisade Field, west of Stonehenge  
Bronze Age field system  
100% hand-excavation required by English Heritage & National Trust

T52 Archaeological features

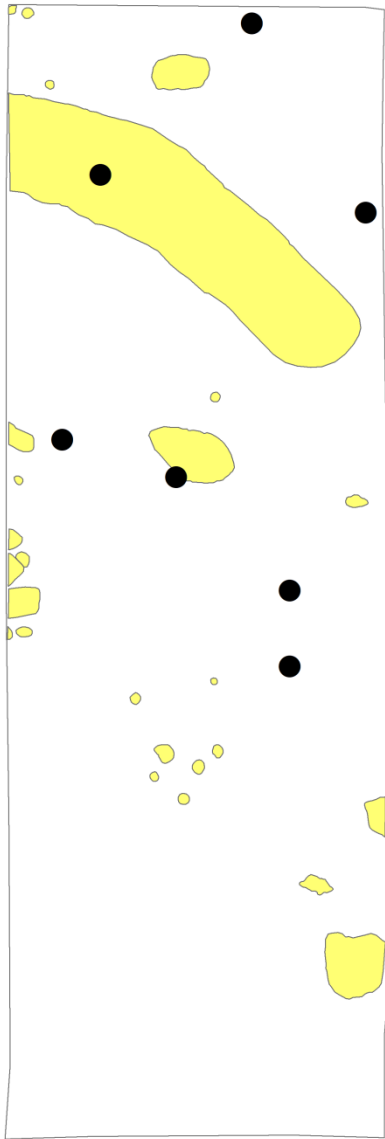

Densities of lithic artefacts varied considerably, as did the types of diagnostic tools, revealing multiple activities from different periods

Diagnostic tools were less than 2% of the finds but without them it would not have been possible to recover evidence of these activities or their date
