Dear Sir

The proposed Stonehenge tunnel will be very expensive and incredibly disruptive .

I believe that two lanes can be built parallel to the existing road which then goes on to become a flyover for Winterbourne Stoke .

The road will need to start on the north side of the A303 , cross the existing road after the Blickling site and then run parallel with the A303 to a flyover .

There will be a loss of some barrows but this is small in comparison with the current proposal .

This plan is deliverable and will deal with the mind blowing congestion we currently have at a reasonable price .

Yours faithfully
Christine Glover
