Dear Grant,

I would like to raise a concern I and my partner have regarding the huge investment that you recently approved for the works to the A303 Stonehenge tunnel/works

After the unprecedented year we have had We are struggling to understand how the £1.7 billion was approved, considering the significant debt the country is in from the events of this year

Surely this colossal sum of money should be spent elsewhere - hospitals/schools/our crumbling roads (especially in Hertfordshire)

Can you please explain the rationale why this has been approved, especially when considering the extremely difficult times ahead with debt the country is in and the overall financial recovery that is needed in the years ahead

Looking forward to your reply

Kind Regards

Lloyd Broughton
