---

I wish to express my concerns about the apparent lack of alternative proposals for the Stonehenge Road Scheme. In particular:

- No alternative routes less damaging to the World Heritage Site have been presented
- No alternatives to a hard engineering solution have been presented together with associated updated construction costs and carbon assessment costings.
- The latest Intergovernmental Panel on Climate Change Report stresses the need to reduce emissions. The Stonehenge Proposal will have the opposite effect.
- The Stonehenge Road Proposal goes against the Environment Act 2021 by working in opposition to nature recovery of the local area.

Please acknowledge the World Heritage credentials of Stonehenge for the Nation and reject this Proposal.

Yours sincerely,

Freya Whitcombe
