I request that you set aside the current plan for the A 303 across Salisbury Plain.

The proposed tunnel does not start far enough away (east and west bound) from the site of the stones nor deep enough to avoid damaging the integrity of the actual archaeological remains and potential remains across the site of the tunnels.

A world class and literally unique site will be irreparably damaged by the current plan.

Set it aside now; and preserve and conserve the entire site for the future benefit of mankind. We should be showing the world just how serious our Nation is with regard to National and International heritage.

Yours faithfully

Owen E Jeffery BA (Wales)
