I wish to express yet again my frus ration at these proposals. right at the start when a presentation was made o the T sbury communi y where I li e I asked why no attempt had been made to explore the option for loca ing especially the Western por al outside the WHS. I was told this hadn't been done 'because there's no point'. no costing nothing.

then no recogn tion has been made of he impact if UNESCO w thdrew WHS status and the mpact th s would ha e on especially o erseas isi or numbers - and the potential for destructi de elopments if the protect on his pro ides is los .

nei her of these points has been addressed or resol ed. I don't in principle object to the tunnel but along with clima e change impac s and reduction in traffic I do not understand why it has to be like this.

yours etc
