Dear Sirs..

I object to this unnecessary road and tunnel development.

Loosing WHS for such an iconic historical and precious landscape at a time when people need it the most will be unforgivable and detrimental to the wildlife and underground water springs.

Breaking up the aqua furs so close to a Mesolithic spring will not only damage the extremely rare waters it will draw water from habitats for miles around. And in a time of man made climate collapse it is an insane project to cover our unique and porous chalk down land in tarmac that will contribute to more flooding.

Please just see the future, a future that doesn't prioritise the car over our natural world and risks the health of our very planet.

yours in gratitude

Indra Donfrancesco
