Subject: Proposal to revive the previous underpass proposal
Date: 04 April 2022 14:31:38

Dear Sirs,

Having lodged my support for the campaign to prevent this development in the World Heritage site, I can only repeat my agreement with their objections.

As I understand it, this plan was formulated before the full extent of the World Heritage site was recognised, takes no account of the need for much further archaeological study and makes no provision for the cataloguing or preservation of the finds which happen to escape destruction. I also understand that after all the anticipated expense and disruption, not to say destruction, the net effect will merely be to remove congestion a few miles further down the main road.

Please implement one of the alternative proposal, preferably bypassing the heritage site altogether.

Yours sincerely,

Duncan Lunan
Science Writer
