---

**Dear Inspector**

**I would like to register my opposition to the revised scheme now being put forward by Highways England.**

**Now that the government are committed to net zero targets I would have expected the whole idea, and need, for the road improvement scheme to have been thoroughly re-examined with an updated carbon assessment not to mention updated construction costs.**

**I am particularly concerned that there have been no changes which take into account the World Heritage Committee decision and recommendations.**

**All the time it has been Highways England pushing their preferred scheme and almost failing to adequately examine alternative, less damaging, alternatives.**

**Finally, this is a road scheme conceived and developed in total isolation when what we should be doing is producing a package of measures to reduce - not increase - road traffic and emissions.**

**Access to the south west could be far better improved by electrifying the railway to Penzance for a start!**

**Yours sincerely.**

**Roger Bastin  
C Eng. MICE**
