To the Planning Inspectorate

## PROTECTION OF A WORLD HERITAGE SITE

I writing to ask for you to reject the National Highways proposed road widening of the A303 around Stonehenge with regard to the following:

- National Highways has not mad any changes to take into account the 2021 World Heritage Committee Decisions
- The impact of this scheme will seriously affect the environment both from emissions and visually
- An alternative route was proposed many years ago as the A303 is totally inadequate for the traffic load is experiences year round

I lived for many years in Amesbury and can tell you that by mid afternoon the lead in the atomosphere could be tasted, smelt and probably was the cause of many cases of asthma, and this does not take into account the corrosive impact on this ancient monument. There have been ancient findings that suggest that Stonehenge was much more important than has ever been realized, what we lose now can never be replaced.

It is with respect therefore that I request that this scheme should be rejected.

Regards

Elizabeth Barton
