Subject: Stonehenge plan for road widening
Date: 04 April 2022 10:33:47

This plan to widen the road around Stonehenge is something which needs to be thought out by the National Highways. Stonehenge attracts so many tourists that there is a need for preservation as it is. There are still so many things to be discovered about this precious site. National Highways seems hell bent on getting their own way regardless of the cost to the actual site and to our heritage buried there. The road should actually be redirected away from the site and a bypass made so that Stonehenge is preserved intact instead of this continual threat by national Highways hell bent on destruction to achieve their aim.
