Subject: an Order granting Development Consent for the construction of a new two-lane dual carriage way for the A303 between Amesbury and Berwick Down in Wiltshire.
Date: 03 April 2022 18:39:08

It is obvious that this construction should not be permitted to go ahead.

Any individual scheme may by itself produce " GHG emissions from the Scheme, including on a cumulative basis, [that] are likely to have any significant effect on the climate, nor will they materially affect the ability of the Government to meet its adopted carbon reduction targets." But that isn't the point, The cumulative impact of all road schemes will have a significant effect on the climate and will materially affect our ability to meet carbon targets.

In the light of the climate crisis, no expenditure should be permitted on any scheme that facilitates road traffic.

Yours

Christine Holloway
