Subject: Stonehenge - Development consent order
Date: 03 April 2022 14:00:02

Good afternoon

The scheme which has been rejected and is now to be re-submitted, ruins a very important archaeological landscape and the artefacts beneath. It puts the whole site in danger of losing its World Heritage status and consequent loss of tourist income. The Secretary of State has already acknowledged this.

Highways has not taken into account the climate change reports published since the original submission, nor has it updated the construction costs.

Please re-examine the development consent order.
