---

Dear Sir or Madam

I strongly object to this resubmitted scheme. The new road and tunnel will blast through one of the most precious and sensitive archaeological sites in the nation, thus severely damaging a key World Heritage Site and destroying important archaeology forever. The climate crisis demands that Government ceases to promote the motor car - if a new road is required at all, an alternative route should be chosen, one that will not despoil the Stonehenge World Heritage Site and its important archaeology.

I am disgusted that this destructive road scheme is even being considered.

Yours faithfully

Pippa Richardson
