---

**I am asking you to reconsider the proposal for the Stonehenge road widening scheme.**

**Below are my comments:-**

**There must surely be a way to protect the Stonehenge site from any adverse impact. This is an international significant World Heritage site we are proud of in the UK and should be protected.**

**Is there not an alternative route to solve this problem, e.g. the Southern Bypass option, which I also understand will cost less money?**

**Have other less damaging options been explored that would protect the Stonehenge site whilst also solving the traffic problems?**

**In all other areas, as a country we are now encouraging consideration for the environment and climate change, has this been considered? This can be done under the Environment Act 2021 which will set new ambitions around nature recovery and can be done if a request is made for a re-examination of Development Consent Order.**

**In the past I have been lucky enough to visit the Stonehenge site many times and have been very proud to network there with people from all over the World. We have a responsibility to protect this site for future generations.**

**I have also experienced traffic hold ups when on route to the South West using the route passing Stonehenge, but have also learnt to find alternative routes.**

**Please, no hasty decisions should be made until every possible avenue has been explored to resolve the traffic situation in sympathy with Stonehenge site.**

**Thank you for reading this.**

**Yours sincerely**

**Jennie**
