I am very concerned that National highways has not made any changes to the proposed Stonehenge road scheme to take into account the 2021 World Heritage Committee Decision; has not acknowledged that the Secretary of State found the Schemes impact on the proposed western cutting area would be “significantly adverse”; has not explored alternatives to this proposed scheme – eg measures to reduce road traffic, road emissions and improve access to the South West; has not updated the Scheme construction costs; and has not updated the carbon assessment and costs. I therefore believe there should be a re-examination of the Development Consent Order.
