---

Dear Sir/ Madam

Please do not widen the road at Stonehenge

The whole area should be protected, as it has not been fully investigated for further items of archeological interest that might be there. Recent findings have discovered that Stonehenge was only an inner circle and it is highly possible that there are many other circles and monuments surrounding it yet to be found. Please do not continue with the road widening, instead be the torchbearer and spearhead an archeological marvel by proposing that the surrounding area be investigated for further. Imagine the wealth that could come from any further discoveries, boosting tourism to England and bringing in the much needed revenue thank you.

Kind regards

Gaynor Reid
