Given the facts that the Secretary of State found the existing Scheme's impact on the proposed western cutting area would be "significantly adverse" and Unesco's view on the problem . I think it would be an unbelievably tragic missed opportunity not to have a fair and impartial a re-examination of the planned route by an independent panel prior to the Secretary of State re examining the scheme. Also given that the scheme construction costs; and the carbon assessment and costs need to be updated prior to any meaningful decision could be made
