---

To the Secretary of State for Transportation,

It is inconceivable that any change to the A303 does not take climate change SERIOUSLY into account. I am afraid, after reading the Stonehenge road widening scheme, that this is indeed the case.

A longer tunnel or diverting the road further south would help protect one of the most important historic sites on the planet and also reduce emissions from traffic.

Please, please, PLEASE take into account comments from the public, from people like me who have a genuine concern for what is taking place.

I would very much like to be kept abreast of decisions on this matter.

With kind regards,  
Lynn Houghton
