Subject: RE:- REDETERMINATION OF A303 STONEHENGE ROAD SCHEME – STOP THE ROAD SCHEME
Date: 05 April 2022 10:34:58
Importance: High

Dear Sir or Madam,

Please receive, acknowledge and accept sincere apologies for the delay in despatching of this very important response to the above proposal entirely due to technical difficulties.

4th April 2022.

Dear Sir or Madam,

RE:- REDETERMINATION OF A303 STONEHENGE ROAD SCHEME æ“ STOP THE ROAD SCHEME

1 Firstly we re-enforce our absolute objection to the above road scheme for reasons originally submitted because of the archaeologists have worked for many decades at the site of Stonehenge and almost certainly is far greater than originally discovered.

2 This would also be an extremely grave social injustice and insult from the founders, the Druids, to all those communities from many countries who settled, lived and died and are now sleeping there for over 5000+ years.

3 Considering all the latest information about the actual size of the whole site we are very surprised that English Heritage and National Trust have failed to withdraw their support because the archaeologists have found evidence of a ring of impressions in the ground so, for all we know there could be far more evidence to indicate a far longer and greater existence of communities having lived there than so far discovered.

4 We ask that, in view of all the social, environmental and historical facts so far discovered to date, which appear to have been ignored by all the agencies supporting this obscene road scheme are finally brought to the very top of the agenda of the Inspectorate who are appointed to approve it, and the whole plan is cancelled. It is an absolute social, environmental and historical disgrace that people who've lived and died and downright disrespectful that these local residents can't rest in peace.

Yours faithfully,

Mr. & Mrs. W. J. & S. M. Lodge
