Dear HM Government

I understand that there was a deadline for this application submissions and i did still indicate there is a right to submit a comment after the deadline date.

But i have some new information.

They cannot build ANY* tunnel near stonehenge. None. Short or long. Its illegal and here here is the case. Do not ignore this the case goes exactly for stonehenge as i have set out a case for the Glen Druid Dolmen in Ireland. the land will be damaged by the tunnel. And when its a religious site this can even be used to protect it from Archeologists as well .. even plane routes flying over and also underground tunnels

Because it is raised as not an objection or observation.. it can be made to you as a report of an attack against the religious site.

Here is the United Nations law

[REDACTED]

United Nations religious site protection.

Is Very relevant. We can now prosecute the department of transport for an attack of the site and surrounding land

Here .. please see full details in my new petition to Cairn homes using this UN law. Im also reporting to Garda, Police Ireland.

All videos and all information and case..

Is for Glen Druid dolmen but i can use it exactly the same for Stonehenge. So we can even stop planes flying over like Taj Mahal and tunnels underneath. It will be not considered by the planning authority but by the police as an attack. [REDACTED]

[REDACTED] There is no legal right to attack a religious site.

Im attaching it here by link. So im laying the case for attack on stonehenge by the same points and clauses as in this case

[REDACTED]

Thank You

Richard Kelly
