Please review your decision again. Please for the sake of our country's precious heritage. I know the Secretary of State has found the impact on the proposed western cutting area would be "significantly adverse" so the question I ask is: why are you still considering going ahead with this?

There are other options to fully consider/ a southern bypass / a longer tunnel - to at least reduce some impact on a UNESCO world heritage site and a site that's also a religious site for many many people.

There have been changes to consider too, concern for climate change and the need to reduce emissions, not increase them as the new scheme will do.

Please for me, my children, my grandchildren and those to come after us all, do what's right for this precious world monument.

Kind regards

Karen stapleton
