Subject: Objection to the proposal

Dear Person reading ,

I object to any routes digging tunnels through what to many of us is sacred land . Please re- route the A303 so it is further away from not only the Henge but all the other sacred sites that surround it , the ground these amazing constructions sit on and are surrounded by is all part of wonder and magic that connects them and us not only to our past but to the sacred Earth . This site is the heart of Britain . One of the wonders of the world. Moving the road would be great , but please don't bury it in this sacred landscape .

I thank you for your time and appreciate this may seem a strange way of seeing things to some but to proceed will do irreparable damage .

To those thinking this makes no sense

It is in a sense like glueing a sign on the Mona Lisa and saying it's ok because it's over the back ground and not the figure . Or cutting out the sky from a Turner . You are destroying a masterpiece . Let's take this great opportunity to shift the road away from this masterpiece , the heart of Britain .

In peace & understanding ,
Andrew
