When I moved to [REDACTED] the by-pass for Winterbourne Stoke was **pegged up** but there was yet another financial crisis at that time and the plan was abandoned.

Since there have been 2 or 3 large enquiries at huge expense,

I still own [REDACTED] and I have tried to sell the property since 2007 (another hiccup at the time, financial crisis) and again later, but the road is so bad, that few people are interested.

The subsequent bypass with the tunnel has been announced. I put the property on the market at a very low price - but until the by-pass gets the go-ahead, I am somewhat lumbered.

The road noise and traffic is unbelievable. This is, after all, the main road from London to the West Country and drivers are held up for such a long time once they get to Stonehenge, or coming the other way.

Never can there have been a worse situation - a highly important road being only single carriageway passing through and wrecking the village of Winterbourne Stoke.

We are desperate and if a tunnel is the answer, let it be !

Subject: A303 bypass Winterbourne Stoke
Date: 28 July 2022 15:30:29

I moved to [REDACTED]..... The bypass for Winterbroune Stoke was pegged out from the A36 to the Longbridge roundabout before Stonehenge. The country must have run out of money - it never happened, Since there have been several large and expensive enquiries to the bypass - all very expensive and useless.

The last enquiry is for the tunnels alongside Stonehenge. This is the main road, shortest, should be quickest road from London to the West Country. The traffic hold ups on this single way carriageway is horrendous and the accidents that occur. [REDACTED], this must be accepted and must go through - for all the drivers on the road and especially for the residents of Winterbourne Stoke - the village is divided by the road and totally unacceptable for residents and drivers. Archeology and geology will have a year to check out what is under the earth. Please let this happen for everybody's sake, except perhaps the Stonehenge Alliance !
