Dear Rt Hon Anne Marie Trevelyan

Please may I add my voice to the further exploration of a southern bypass as set out in the report of the Advisory Mission rather than the shorter tunnel being considered?

The building of a road near Stonehenge is an important decision, as the monument is globally important to many people.

My hope is that the final decision is one that UNESCO, archaeologists, and all interested parties are positive about and honours the unique historical significance of this world heritage site.

Thank you

Louise and PeterSneyd
