---

This scheme is untenable and puts at risk our world famous UNESCO site of Stonehenge. This has already gone through many stages and there has been no support.

- Independent Specialist Examiners refused it.
- The UNESCO's World Heritage Committee opposed it.
- The former Transport Secretary thought the scheme to be significantly unviable.
- And the High Court judgment quashed the DCO in part because the Transport Secretary had not given proper consideration to alternatives.

Stonehenge is perhaps the world's most famous prehistoric monument, so ensure that serious consideration is given to the viable alternatives and ensure that Stonehenge is not threatened after surviving for 5,000 years.

Stonehenge is the world's most famous prehistoric monument we must not put it under threat when there are viable alternative solutions such as a southern bypass, which should be looked at, or that at the very least, any tunnel should be extended to the western WHS boundary. Don't let us down or undermine your integrity.

Please, please make sure you will be remembered as the saviours of Stonehenge
