Ref Planning Act 2008 (as amended) and the Infrastructure Planning (Examination Procedure) Rules 2010

I agree with points made in UNESCO's Advisory Mission Report that advised that there should be a less damaging scheme, such as a southern bypass. Also that if the scheme is to proceed then, at the very least least, any tunnel should be extended to the western WHS boundary.

If the Transport Secretary is intent on going ahead with the scheme, I would hope that it will be subject of another formal public Examination so that the new information submitted by National Highways and others since 2020 can be fully considered.

Thank you

Jo Ripley
