Subject: re report of the advisory commission
Date: 26 September 2022 12:15:55

The plan in the National Highways submission risks destroying archaeological evidence at one of the most important pre-historical sites in the world. The Advisory Commission has proposed reasonable and realistic plans to mitigate this and they should be followed. To do otherwise would be short-sighted in the extreme. I continue to object to the current plans and fully expect that they be submitted to further public scrutiny.

Sincerely, Christopher Burrows
