---

The route through Marazanvose & Nancarrow Farm & impacting detrimentally on Nancarrow venue business would, if allowed, be desasterously damaging, forever! It would degrade our community's living environment, our & our neighbours connectivity with our community & ours to farmland on the North side of Marazanvose. Devaluation of the location of all dwellings North & South of the current & proposed roads would undoubtedly occur.

The severance of Nancarrow & the position near the farm hub creates huge & lasting insurmountable farm management problems. The mitigation works offered do not solve the problems only propose to make continued farming possible but with undoubted, lasting extra difficulties, the severity of which are not known.

1 home is destroyed preventing someone making use of it & the attached land for home or business.

A planned & consent-granted home would be destroyed. This would be my intended retirement cottage built by renovating, sensitively, a historic "grooms cottage" which could've been listed had attention been brought to it. It is not a "derelict barn" as insultingly suggested by Highways England in their response to my "relevant representation statement" statement".

As a barn it was roofed and useful, maintained & improved by my recent excavation of the footings in preparation for full renovation.

For any further detail on how bad this route is to me & my family please refer to my previous written representation and relevant representation.

Gravely and sincerely,  
Peter Mewton
