Subject: Ref. Latest plans for compound

Until last night we local people had no idea that a huge compound for this project is planned to be on fields adjacent to our homes. I believe this site plan was available somewhere on your endless website and we all seem to have missed it!!!! Certainly it was NOT shown on your Feb. 1018 Brochure showing the plans for the road .

We understand that this compound will be in use for 4 years, and the movement of machinery, site noise and light pollution from such a big site will make our lives intolerable and our properties unsaleable.

Whilst we understand the need for this road improvement we don't feel these works effects on our lives have even been considered.
