Subject: NSIP - M42 Junction 6 Improvement - Rule 6

Dear Highways England and Planning Inspectorate,

The ExA for the M42 Junction 6 Improvement (TR010027) has requested two separate Statements of Common Ground (SoCG) as below, **by 24th June**. We have recently (on another project) 'circumvented' such an approach by producing a short 'Position Statement' instead, after consultation with the other parties and would be grateful if we could take the same approach this time as well. HSE raised a 'RR' not necessarily as we had issues but because we needed some specifics before we finalised our advice.

Our Relevant Representation

"Notwithstanding Highways England's acknowledgement in the Consultation documentation of the presence of the 3 Major Accident Hazard Pipelines ('Safety advice relating to statutory undertaker assets'), we are unable to provide specific LUP advice regarding this proposal until details of any proposed alterations/upgrade to the Major Accident Hazard Pipeline(s) are made available to HSE, by the Developer / Pipeline Operator".

Requests for SoCG

The Applicant, Cadent Gas Limited and the Health and Safety Executive, to include:

- Measures to mitigate the effects of the scheme on transmission systems and equipment including:
- The Bickenhill AGI
- The safety of the measures proposed

The Applicant, the Esso Petroleum Company Limited and the Health and Safety Executive, to include:

- Measures to mitigate the effects of the scheme on transmission systems and equipment
- The safety of the measures proposed

We refer back to our response when consulted again under Section 42 of The Planning Act 2008 (25/9/18) and would also be grateful for clarity on the Bickenhill AGI query.

Kind regards,

Dave Adams

Dave.MHPD.Adams
