Dear Sirs

M42 Junction 6 Improvement Works - Written Questions and Requests for Information

We write further to your letter dated 31 May 2019 with reference number "TR010027". We provide our responses to written questions and requests for information as follows:

Question Number	Response
1.11.7	The data provided in the Traffic Assessment (APP-174) appears to be out of date based on when the information was originally obtained. Our vehicle numbers increased in 2017 by circa 164,000 vehicles compared to 2016, and our vehicle numbers increased again in 2018 by circa 47,000 vehicles compared to 2017. 2019 is already showing another increase of circa 37,000 vehicles compared to 2018. We would welcome an assurance or confirmation that the traffic modelling has taken into account, or will take into account, the increased figures.
1.11.8	We do not have a more full response to this question other than the information provided above as regards question 1.11.7.
1.11.9	Same as 1.11.8.
1.11.10	Same as 1.11.8.
1.11.12	Same as 1.11.8.
1.11.18	Same as 1.11.8.

Please contact the writer should you have any further questions concerning our responses to your written questions.

Yours faithfully

Tim Roberts
