Appen	dix A: Accident Data in support of ExQ 2.13.16	10

1. Introduction

1.1.1 This document provides additional information referred to in the Applicant's responses to the Examining Authority's Second Written Questions (HE document reference: TR010020/EXAM/ Volume 9.58) with regard to Traffic, Transport and Road Safety. The two documents should be read in conjunction with one another.

1.2 **Question 2.13.7 asks:**

"For the inter-peak period please provide traffic flow comparisons for the Core Scenario Do-something versus Do-minimum, in tabulated and drawn forms, similar to those shown for the AM and PM peaks in Tables 4-6 and 4-7 and Figures 4-6 and 4-7 set out in 'Traffic Forecasting Report' [REP1-010]."

1.2.1 The supporting data for the response to Question 2.13.7, with regard to traffic flow comparison between the DM and DS scenarios, is found in Section 2 below.

1.3 **Question 2.13.29 asks:**

"In submitting your respective updated SoCG at Deadline 5 (D5) please ensure that the following matters are addressed in those SoCGs:

- c) Confirmation as to whether any of the B2215's links between its junctions with the A3 and A247 and the B2215's junctions with Newark Lane and Rose Lane are or are not currently operating at capacity."
- 1.3.1 The supporting data for the response to Question 2.13.29 with regard to operational performance is found in Section 3 below.

1.4 Question 2.13.16 asks:

"On pages 28 and 29 of REP4-005 as part of the collision assessment that has been undertaken reference is made to 20 personal injury collisions having occurred between 1 December 2013 and 30 November 2018. With respect to the data for those 20 collisions please plot on a plan where each of those collisions occurred, identifying each collision with some form of identifying reference number and provide written summaries setting out the details for each of those incidents."

1.4.1 The supporting data for the response to Question 2.13.16, and associated Figure with regard to the collision data is found in Appendix A below.

2. Information Requested in ExQ 2.13.7

Table 3-2 - Operational Performance: 2017 Ockham Park – 2017 Base

Appendix A: Accident Data in support of ExQ 2.13.16

Please find below, in response to ExQ 2.13.16:

- a figure showing the location and severity of recorded accidents (during the period 01/12/2013 to 30/11/2018) between Ockham Park interchange and M25 junction 10
- accident data logs for each of the accidents shown on the figure.

A3 - M25 J10 to Ockham Junction

Accident Date BETWEEN '01-Dec-2013' AND '30-Nov-2018'
