20th April 2020

Dear Sir

RE: M25 Junction 10 / A3 Wisley Interchange Improvement Plan

Comments on any additional information/submissions received by D6

HE's submission for Deadline 6 - Rep 6 - 002 Proposed amendments (change 7 to 9)

We are pleased to see this submission was made and to read that 'HE has obtained the consent of all interests affected by the change to the inclusion of the additional land in the red line boundary.' If this is accepted and the Secretary of State approves this, then this would resolve safeguarding concerns that would arise by splitting the campsite in two. This would also give us uninhibited access to the woodland area and the unique experiences which that provides for our young people. This would keep traffic emissions, noise, pollution etc in the same corridor and allow us to provide the maximum distance and natural tree and shrub barrier between the traffic and our young people camping and pursuing other activities on site.

We note that towards the end of the same document it mentions that HE intends to make the formal request to the ExA to accept the Proposed Changes in the week commencing 6th April 2020. We hope that this has happened.

Yours sincerely

Christine Donovan
County Commissioner Greater London West
