ADDRESSBASE DATA CATEGORISATION

- 1.1.1. The Ordnance Survey AddressBase Plus® data allies the Royal Mail address database with Ordnance Survey six figure grid references. These data also include a categorisation scheme with primary, secondary, tertiary and quaternary codes, detailing the nature of each data entry. Examples are presented in **Table 3-1** below.

Table 3-1 - Example Classification Codes for AddressBase Plus® Database

Code	Class description	Primary code	Secondary code	Tertiary code	Quaternary code
CE03PS	Primary School	C (Commercial)	E (Education)	03 (Preparatory / First / Primary / Infant / Junior / Middle School)	PS (First School)
RD04	Terraced	R (Residential)	D (Dwelling)	04 (Terraced)	-
RG	Garage	R (Residential)	G (Garage)	-	-
RI02NC	Non-commercial lodgings	R (Residential)	I (Residential Institute)	02 (Communal Residence)	NC (Non-Commercial lodgings)

- 1.1.2. The categorisation scheme is extensive with more than 550 different individual codes, and it can be seen from **Table 3-1** above that simply filtering the data by the primary code, e.g. by 'R' for residential, would not be appropriate, because in this example, the retained data would include non-sensitive entries, such as garages.
- 1.1.3. A filtering process with better definition is therefore required in the determination of those receptors within the AddressBase Plus® data that are to be considered as part of the assessment work.
- 1.1.4. The data has therefore been filtered into the Categories presented in **Table 3-2** below. A colour has been allocated to each category. **Table 3-3** then presents all of the different AddressBase Plus® classification codes with each coloured to denote to category to which it has been allocated.

Table 3-2 – Summary of Categories and Colour Codes Applied to AddressBase Entry Codes

Category
Residential
Temporary
Medical
Educational
Religious / Place of worship
Community facilities sensitive
Community facilities other
Outdoor recreation parks
Not noise sensitive
Other
