We have a number of concerns regarding the scheme and its effect on the Lady Park and Lamesley Area

Increased noise

Increased pollution

Loss of trees (some with TPO) and vegetation which currently protect our community from noise and pollution

Loss of green corridor and wildlife

In the construction stage we understand our green fields are to be used for storage and compound which again will effect our wildlife This is a wetlands area and greenbelt

We needs assurances any tree loss will be replaced by mature trees and that we are consulted on landscaping etc

The current plans are quite vague as to how much land/vegetation will be lost at the entrance to Lady Park

We feel that the sound barrier should be extended along the A1 north slip road as this will encroach further onto the village

Concerns over increased traffic through villages during construction

Lamesley and Lady Park Residents Association
