

On behalf of our client, we respectfully request to be present at the ASI proposed for Day 2 (North) in respect of the areas referred to under the Mardyke footpath section and in respect of our client's land holding at South Ockendon Hall Farm. We consider that the ExA would benefit from our client's knowledge of the complex nature of land use which includes the development of the Medebridge Solar scheme in 2023/24 on our client's land and the interaction of LTC proposals with the proposed urban extension of South Ockendon (to include our client's land) to assist the ExA in better understanding the LTC proposals and their effect on land use generally; including the effect of proposed WCH routes which we consider should be part of the ASI programme across the LTC route.
