

Port of Tilbury London Limited (PoTLL) have reviewed the draft agendas for ISH1 and ISH2. PoTLL note that the Asda roundabout on the A1089 is not identified by the ExA in the agenda for ISH1 as a highway pinch point (item e)i). This roundabout was identified within the Application documents as a known bottleneck, is located on the main road route for construction traffic to visit the construction compound for the North Portal and forms part of the only access road to the Port of Tilbury. PoTLL understand the roundabout is presently operating at capacity. PoTLL therefore takes this opportunity to suggest that the Asda roundabout should be added to the locations listed in this agenda item.
