

Summary Of Open Floor Hearing 2

Leigh Hughes LTC -AP546

I would just like to summarise the information I presented at the Orsett Hall floor hearing. I touched on points such as National Highways dismissal of option A, which was not included in the 2016 consultation, Air pollution in Thurrock and the toxic triangle residents would be engulfed in if proposed LTC was to go ahead, the Mardyke Valley (flood plain), the destruction of the Wilderness and Grade 1 Agricultural land. My personal experiences and concerns living on the red line and just outside the order limits' I have concerns for the way the project has progressed from the point the route was chosen to where we are now, going through the DCO process. I have found National Highways conduct and bedside manner absolutely appalling from the lack of information at consultations and refusal of information and being told at consultations 'your questions are too technical you'll have to wait to the DCO'. Since 2016 this has been their mantra I have been going round in circles, consultation then questions, no answers wait for DCO next consultation same questions no answers wait for DCO and so on and so on during every consultation. When viewing the DCO documentation what has come to light is just how intimidating and time consuming the documents are information is hard to find and its very stressful.

Screen shot of my property circled in green.
