# 1 Introduction

## 1.1 Purpose of this document

- 1.1.1 On 31 October 2022, National Highways (the Applicant) submitted an Application under section 37 of the Planning Act 2008 for an order to grant development consent for the A122 Lower Thames Crossing (the Project). On 28 November 2022 the Planning Inspectorate accepted the Application for Detailed Examination.
- 1.1.2 A Statement of Commonality was submitted with the Application to assist the Examining Authority (ExA) in understanding areas of commonality across the Statements of Common Ground (SoCGs) which have been prepared between the Applicant and a range of parties.
- 1.1.3 The Applicant notes that procedural decision PD-013-17 within the Rule 6 Letter [\[PD-013\]](#) identifies nine documents which should be submitted at each Examination Deadline or included as a 'nil return'.
- 1.1.4 The Statement of Commonality was identified as one of these documents and as such, will be submitted at each Examination Deadline where new or updated SoCGs are submitted, or included as a nil response if no new or updated SoCGs are being submitted.
- 1.1.5 The document comprises the Applicant's understanding of the stakeholders' positions, as set out in the SoCGs submitted by the Applicant to the ExA at Examination Deadline 1.
- 1.1.6 For more detailed information on the respective stakeholders' positions, in relation to the topics covered in this Statement of Commonality, please refer to the individual SoCGs.

## 1.2 Structure of this document

- 1.2.1 This document comprises four chapters as described below:
- a. Chapter 1 (this chapter) sets out the purpose and structure of the document.
  - b. Chapter 2 provides an introduction to the drafting of the SoCGs along with a summary of their structure.
  - c. Chapter 3 provides an up-to-date list of the SoCGs and their status.
  - d. Chapter 4 provides a summary table (matrix) which indicates areas of commonality across headings within the SoCGs and presents some high level commentary.

## 2 Statements of Common Ground

- 2.1.1 The Applicant has sought SoCGs with a number and range of parties in order to capture their respective positions on material matters relating to the Application.
- 2.1.2 A full list of the SoCGs and their status is provided in Chapter 3 where:
- a. Table 3.1 lists SoCGs submitted with the Application on 31 October 2022.
  - b. Table 3.2 lists new SoCGs prepared with parties in response to the Rule 6 Letter [[PD-013](#)].
  - c. Table 3.3 lists additional SoCGs with further parties that were not submitted with the Application, or requested in the Rule 6 Letter [[PD-013](#)], but which the Applicant feels will assist the Examining Authority.
- 2.1.3 To ensure consistency across the SoCGs, a uniform approach has been taken to drafting the SoCGs. Each is generally structured as follows:
- a. A clear indication of the status of the SoCG.
  - b. An introduction, setting out the purpose of the document, an overview of the key terminology, and a summary of the movement of Matters where the SoCG is an updated version.
  - c. A table setting out the characterisation of the positions of the Applicant and of the parties on each Matter, and the status of agreement of the Matter. Across the SoCGs this table is structured by a common list of topics.
  - d. A summary of engagement undertaken, and information shared in order to draft the position and reach an agreed status of Matters within the SoCG.
  - e. Where available, appendices providing additional information relating to the documents considered within the SoCG, and information on the engagement undertaken.
- 2.1.4 A uniform approach has been taken across the suite of SoCGs to documenting the position on each matter. The position on each Matter can be one of the following:
- a. Matter Agreed
  - b. Matter Not Agreed
  - c. Matter Under Discussion

## 3 List and status

- 3.1.1 This Chapter of the document provides a list of the SoCGs and a summary of the current status of each.
- 3.1.2 At Application the Applicant asked stakeholders to provide a signature, where appropriate, to signify that they believed the SoCG was an accurate description of the matters raised, and the current status of the SoCG. For Examination Deadline iterations of the SoCGs, a signature will not be sought (except for final versions) in order to create a more streamlined process for all parties. Instead, stakeholders are asked to provide confirmation via email that the SoCG is an accurate description of the matters raised, and the current status of the SoCG.
- 3.1.3 The status of the SoCG is therefore summarised by one of the following:
- a. **Agreed SoCG** – when it is the final version of the SoCG and has been signed by both parties.
  - b. **Agreed Draft** – a draft SoCG with matters outstanding which has been endorsed by the party via email to confirm it is an accurate description of the matters raised and the current status of each matter. In most cases, the matters outstanding have clear, defined actions to resolve.
  - c. **Draft** – a draft SoCG with matters outstanding and is unendorsed. The draft SoCG has been drafted by the Applicant, but the party has not yet been able to complete their review in line with their governance process. The Applicant considers that these SoCGs present an accurate description of the matters raised and the status of each matter, based on the engagement that has taken place to date. In most cases, the matters outstanding have clear, defined actions to resolve.

Thames Water Utilities Ltd	9.33 v1	Yes									Agreed Draft

*\*Further additional SoCGs may be submitted at later deadlines, as applicable*

## 4 Commonality

### 4.1 Summary

- 4.1.1 This Chapter of the document provides a summary of the material matters covered in each SoCG and demonstrates where there is commonality in the matters being discussed with parties.
- 4.1.2 Table 4.2 shows (a) the headings covered by the SoCGs running along the top, and (b) the parties running down the side.
- 4.1.3 Within the matrix in the table, the colour coding represents (a) whether matters under the headings are broadly agreed, under discussion, or not agreed, or (b) whether the heading has not been a material matter in engagement. This is represented by colour coding as set out in Table 4.1.

**Table 4.1 Commonality colour coding**

Matters under the heading broadly agreed	
Matters under the headings broadly not agreed	
Matters under the headings broadly under discussion	
No matters raised at this point	

- 4.1.4 Table 4.2 has a primary purpose to assist the Examining Authority in understanding the headings which remain under discussion or not agreed, particularly such headings where the position is shared across more than one stakeholder. Therefore, the categorisation and colour coding in the matrix is intended to represent the broad position per heading (it is not absolute). In addition, footnotes have been used to indicate exceptions.
- 4.1.5 There are limitations with this approach: the summary does not identify particular matters within headings – and any commonality (or not) on those matters.
- 4.1.6 Table 4.2 lists Interested Parties who have a SoCG that was either submitted at Application, or at a subsequent deadline. For Interested Parties where a SoCG is in development but not yet submitted, they are not listed in the Table.
- 4.1.7 At Deadline 1 if an updated SoCG has not been submitted then the colour coding presented in Table 4.2 is as it was at Application. Where an updated SoCG has been submitted at Deadline 1, the colour coding has been updated in accordance with the changes made in that SoCG.

<sup>1</sup> 43 'Road drainage and the water environment' matters agreed, two are not agreed and one remains under discussion

<sup>2</sup> 40 'Cultural heritage' matters are agreed, three remain under discussion

<sup>3</sup> 16 'Landscape & visual' matters are agreed, six are not agreed and four remain under discussion

<sup>4</sup> Two 'DCO and consents' matters agreed, one remains under discussion

<sup>5</sup> *Two 'Road drainage and water environment' matters are agreed, one is not agreed and one remains under discussion*

<sup>6</sup> *Three 'Road drainage and the water environment' matters are agreed, one remains under discussion*

<sup>7</sup> *Six 'Design - road, tunnels utilities' matters agreed, one is not agreed*

<sup>8</sup> *Three 'Population and human health' matters agreed, one is not agreed*

## 4.2 Commentary at Examination Deadline 1

- 4.2.1 Table 4.2 shows that there are a large number of topics which are not of particular interest to some parties. This reflects the reality that different parties have different technical and professional interests, and/or particular spatial and local interests, which inevitably focuses interest towards particular topics:
- The Statutory Environmental Bodies are particularly focused on environmental topics, and less focused on Design, Operation and Maintenance, and Traffic and Economics matters.
  - The Business and Industry cohort is focused on a small number of issues.
  - For the Statutory Undertakers, Utility Owners and Regulators, common ground has been sought across DCO and Consents, Design (roads, tunnels, utilities), Construction, Operations and Maintenance, and Protective Provisions – most other topics have not been of consequence to these stakeholders.
  - Across the local authorities and Transport Bodies cohort, and community and parish councils cohort, common ground has been sought across the breadth of topics.
- 4.2.2 Between Application and Deadline 1 a total of 59 SoCGs have been submitted. Across this suite of SoCGs there are some emerging areas of commonality on particular principles of the Project, across the breadth of stakeholders.
- 4.2.3 The top five headings where matters are either **all or broadly all agreed** are:
- Geology and Soils** – matters raised by two parties, 100% of matters agreed.
  - Cumulative effects** – matters raised by two parties, 100% of matters agreed.
  - Need for the Project** – matters raised by two parties, 75% of matters agreed.
  - Marine Biodiversity** – matters raised by four parties, 75% of matters agreed.
  - Consultation and Engagement** – matters raised by 19 parties, 58% of matters agreed.
- 4.2.4 The top five headings where matters are **broadly still under discussion** are:
- Socio-economic** – matters raised by seven parties, 71% of matters remain under discussion.
  - Sustainability** – matters raised by three parties, 67% of matters remain under discussion.

- c. **Land and Compulsory Acquisition** – matters raised by 14 parties, 64% of matters remain under discussion.
- d. **Protective Provisions** – matters raised by 23 parties, 57% of matters remain under discussion.
- e. **Air Quality** – matters raised by 16 parties, 56% of matters remain under discussion.

4.2.5 The top 5 headings where matters are **broadly not agreed** are:

- a. **Wider Network Impacts** – matters raised by 23 parties, 70% of matters are not agreed.
- b. **Climate** – matters raised by six parties, 67%, of matters are not agreed.
- c. **EIA methodology** – matters raised by eight parties, 63% of matters are not agreed.
- d. **Noise and Vibration** – matters raised by nine parties, 56% of matters are not agreed.
- e. **Traffic and Economics** – matters raised by 20 parties, 55% of matters are not agreed.

## Glossary

Term	Abbreviation	Explanation
<b>A122 Lower Thames Crossing</b>	<b>Project</b>	A proposed new crossing of the Thames Estuary linking the county of Kent with the county of Essex, at or east of the existing Dartford Crossing.
<b>Application Document</b>	-	In the context of the Project, a document submitted to the Planning Inspectorate as part of the application for development consent.
<b>Development Consent Order</b>	<b>DCO</b>	Means of obtaining permission for developments categorised as Nationally Significant Infrastructure Projects (NSIP) under the Planning Act 2008.
<b>Development Consent Order application</b>	<b>DCO application</b>	The Project Application Documents, collectively known as the 'DCO application'.
<b>Examining Authority</b>	<b>ExA</b>	The Examining Authority is appointed by the Secretary of State to examine an application for a Development Consent Order and make a recommendation.
<b>National Highways</b>	-	A UK government-owned company with responsibility for managing the motorways and major roads in England. Formerly known as Highways England.
<b>Nationally Significant Infrastructure Project</b>	<b>NSIP</b>	Major infrastructure developments in England and Wales, such as proposals for power plants, large renewable energy projects, new airports and airport extensions, major road projects etc that require a development consent under the Planning Act 2008.
<b>Planning Act 2008</b>	-	The primary legislation that establishes the legal framework for applying for, examining and determining Development Consent Order applications for Nationally Significant Infrastructure Projects.
<b>Statement of Common Ground</b>	<b>SoCG</b>	A Statement of Common Ground is a written statement containing factual information about the proposal which is the subject of the appeal that the appellant reasonably considers will not be disputed by the local planning authority.
