I oppose the building of the LTC, because it will cause lots of problems on the roads while it is being built and cost too much money.

The route won't help the issues at the Dartford Crossing and costs to build it are going up and up. The cost is too high when the country is suffering financially.

Living near it is going to be awful for years while it is built and after.

Noise and pollution will be much worse when it is being built and after. Not good for the environment.

Local roads and motorways badly need repairing. All our roads should have the money spent on them to repair potholes, bad surfaces and make them better and safer for the type of vehicles which are part of modern day traffic. Invest money to make sure we can be environmentally friendly. Provide better, cheaper bus and train services.
