

Submission ID: 19639

Advised at LTC Consultations that Compound would remain throughout Construction period and is one of the Main Compounds.

Hoarding and/or fencing is unsightly and would be on what is currently green belt land, I believe. This will be an eyesore over a large area for 5-6 years plus.

Hedgerow screening planted before construction as I previously requested would be more beneficial in mitigating resultant noise, dust and air pollution. It would be more aesthetically pleasing to the eye than the usual hoarding or construction fencing.
