

Submission ID: 25159

I have read and totally agree with Deadline 10 Submission made by TCAG on behalf of people like me who strongly oppose the LTC.

It will cost way too much. Unbelievable how the cost has increased by billions, not millions.

It will damage the environment and places around me.

The air pollution would be much too high and it is already very bad.

Traffic congestion will be worse, not better and will be more widespread.

With no hard shoulder and 4 lanes of fast moving traffic, it will not be a safe road.

Complicated junctions will cause lots of problems and safety issues.

We need better public transport and this doesn't provide for it.
