You have already received my strong opposition to what I term the 'half-baked, half-a-bypass' proposal. After waiting for several decades for a full bypass from the end of the M67 at Mottram-in-Longdendale and going straight through to the east of Tintwistle - i.e. to take ALL trans-pennine traffic including HGVs asway from local roads - local residents in Glossopdale - of whom I am one - are presented with a truly ridiculous scheme where the new road joins the horrendously congested Mottram Moor half way along! Highways officers admit that - if built - will actually increase traffic flows in many parts of Hadfield, Glossop and Hollingworth. I am happy to speak at the inquiry - please let me know if am able to do that. Thanks.
