Dear Sirs,

I note the further concerns expressed regarding badgers and further note that there is no provision for deer fencing along both sides of the 'Glossop Spur'. Given that this new road crosses open land which is frequented by roe deer, and will be constructed through a block of woodland which is the main habitat for a group of roe deer, it seems a matter of pure common sense to erect suitable fencing to prevent inevitable collisions between said deer and vehicles.

Yours faithfully,

Warner Bower
